

e-Origin Wallet

The data exchange solution of **trustable product data** for international trade actors

Your challenges

- Fear to share information for confidentiality reasons
- Information is not easily accessible and well structured
- Difficult to Trust

Our solution

A solution providing **trustable information** about products, thanks to **collaborative** enrichment & certification of product's information.

Tailored to foreign trade

Structured product data tailored for customs declarations and international trade

Legal enforcement

Legal proof of authenticity for each product information

Open & Interoperable

An open approach proposing an interoperable wallet with full sovereignty on your data - no vendor lock-in!

Easy App & API

Easy apps & API to increase your productivity

Let's get started!
