

# SSI4DTM Self-Sovereign Identity for digital contract transactions

Create and control  
your  
digital identity

Streamline your  
business  
performances

Auditability and legal  
recognition  
across the EU

Watch SSI4DTM demo at

[https://youtu.be/rAt3qQgJ7\\_4](https://youtu.be/rAt3qQgJ7_4)

Watch interoperability video at

<https://youtu.be/5TN6neH77aE>

## Interoperability

Commercio created a KYC protocol where any Company can onboard customers with high confidence about their true Identity and Customers will instantly sign-up effortlessly.

GAYA is an agreement platform that allows anyone to remotely meet via a videoconference and eSign contracts with a public Notary that legally certify the parties' identities and the deeds

## How it works

- Register and obtain your "Personal data" and "VideoID" SSI credentials
- eSign legal binding contracts and notarize the history of the transaction for audit proof
- Be in touch with your business digital peers

The project has been developed with funding from eSSIF-Lab, European Commission, as part of the Horizon 2020 Research and Innovation Programme, under Grant Agreement N°871932 and it's framed under Next Generation Internet Initiative
